

STAINLESS STEEL PE INSERTS – TI

TECHNICAL SPECIFICATIONS

DESCRIPTION

This product is used to provide inside support for PE and PVC pipe material when couplings are used. The construction gives a circumferential inside support to the pipe ends. The inserts are always custom made to give the best support available with or without wedge.

TECHNICAL DATA

Material	Stainless steel AISI 304.	
Available diameters	Inserts for following PE pipe diameters are available: 50 · 63 · 73 · 90 · 110 · 125 · 140 · 160 · 180 · 200 225 · 250 · 280 · 315 and 355 mm.	
Available SDR measurements	The above mentioned diameters can be combine with following SDR measurements according to DIN8074, to get the right insert to fit the pipe: SDR 7,5 · 9 · 11 · 13,6 · 16,6 · 17 · 17,6 · 21 · 26 · 33 34 · 41 and SDR 50	
Length	Available in lengths: • Diameter 50 - 63 - 75 100 mm. • Diameter 90 - 110 - 125 120 mm. • Diameter 140 - 160 - 180 140 mm. • Diameter 200 - 225 - 250 - 280 - 315 - 355 160 mm.	
Additional	Only available in quantities of 25 units per position.
